

## Valery Sandler

Ashdod, Israel | 0546167500 | valerysandler@gmail.com

LinkedIn: <https://www.linkedin.com/in/valerysand/>

Languages: English (Fluent), Russian (Native), Hebrew (Native)

---

## Summary

Fullstack Developer with 1.5+ years of experience in frontend and backend web development. Specialized in building scalable, performant, and user-centric applications using React, TypeScript, and Node.js. Comfortable working with REST APIs, authentication, and real-time data via WebSockets. Experienced with AI integration (GPT-4) and workflow automation. Strong team player with hands-on experience collaborating with designers, clients, and Agile teams.

---

## Professional Experience

### Frontend Developer – OrdAir (*On-site* | 2023 – 2024)

- Built a military-grade record management system from Figma mockups, collaborating closely with designers and stakeholders
- Translated UI/UX concepts into responsive React components with context API and component architecture
- Participated in architectural decisions and implemented clean, maintainable frontend structure
- Integrated SharePoint for data connectivity and ensured SPA performance and accessibility compliance
- Communicated directly with clients to refine requirements and deliver practical interface solutions
- **Tech:** React, TypeScript, Context API, MUI, Tailwind CSS, SharePoint, HTML, CSS

### Fullstack Developer – Feelthere (*Hybrid* | 2022 – 2023)

- Developed a multistreaming mobile app with RTMP support and SDK integrations for YouTube, TikTok, and Twitch
- Built OAuth-based authentication (Google/Facebook) and migrated backend to TypeScript with scalable architecture
- Designed database schema, backend services (REST, WebSockets), and development environments
- Refactored server logic, improved performance, and automated releases via CI/CD
- **Tech:** React Native, Node.js, TypeScript, RTMP, REST APIs, OAuth2, MongoDB, Google/Facebook SDK, Git, CI/CD

## Military Service

Israel Defense Forces ( 2015 – 2018) – F16 Aircraft Team Leader.

---

## Technical Skills

**Languages:** JavaScript, HTML5, CSS3, Python (basic), Google Apps Script

**Frontend:** React, React Native, Next.js (basic), React Router, Context API, Redux (basic)

**Styling & UI:** Tailwind CSS, MUI (Material UI), Styled Components, SCSS

**Backend:** Node.js, Express.js, REST APIs, WebSockets, RTMP

**Authentication:** JWT, OAuth2, Google API, Facebook API, Passport.js

**Databases:** MongoDB, Mongoose

**AI & Automation:** OpenAI GPT-4 API, Prompt Engineering, ChatGPT, Streamlit, python-telegram-bot

**DevOps & Tools:** Git, GitHub, Postman, Railway, CI/CD Pipelines (basic), Docker (basic)

**Architecture & Patterns:** SPA, Component Composition, Clean Code

**Workflow & Design:** Figma, Agile/Scrum (basic)

**Cloud & Deployment:** Vercel, Netlify, Streamlit Cloud, Railway

**Async & Data Handling:** Promises, async/await, Axios, fetch, file parsing (DOCX, PDF, CSV)

**Other:** Linux CLI (basic), API versioning, environment setup

---

## Side projects

**AI Resume Optimizer (2025)** [Live Demo](#) | [Github](#)

- Tool built to automate resume tailoring for specific job descriptions using GPT-4
- Uploaded resumes and job descriptions to GPT-4 via API and received personalized matches
- Automatically generated tailored resume drafts based on JD analysis
- Built with ChatGPT support and integrated file upload, prompt engineering, and basic UX
- **Tech:** Python, Streamlit, GPT-4 API

**Telegram Job Tracker Bot (2025)** [Telegram Bot](#) | [Github](#)

- Asynchronous Telegram bot to manage job applications
- Logs job info and tracks status
- Uses SQLite and python-telegram-bot
- **Tech:** Python, SQLite, Railway, Async/Await
